

## List of Tables

2.1	Amplifier characteristics.	19
3.1	Important parameters and their values used in the amplifier-placement algorithms.	37
3.2	Comparison of the amplifier-placement algorithms.	54
3.3	Location of amplifiers for Sample Network 1. (Output of Module IV.)	58
3.4	Location of amplifiers for Sample Network 1 using the link-by-link method.	59
4.1	Relative performance of the various amplifier placement schemes.	74
4.2	Exact amplifier placements for the network depicted in Fig. 4.6.	77
4.3	Transmitter and receiver powers for the network depicted in Fig. 4.6.	78
5.1	Comparison of analytical models.	101
6.1	System parameters and their values used.	124
A.1	Set of interfering signals for each primary signal at a $2 \times 2$ switch.	140
A.2	Set of interfering signals for each primary signal at a $4 \times 4$ switch.	141
A.3	Set of interfering signals for primary signals originating from input port 1 at a $8 \times 8$ switch.	142
