CSCE 155 – Lab: Strings

Worksheet – C Version

Name _____

1. What happens if you don't correctly terminate the string in `initializeBlankString()`? Why?

2. The dictionary.txt file contains a list of words that can be used for the mystery word. Add more words to the file so that there are at least 50 (you can just copy and paste the existing list a few times). Run the program again. What happened? Why?

3. Demonstrate your working code to a lab instructor.
