CSCE 155 – Lab: GUI

Worksheet – Java Version

Name _____

1. Examine the code in the `Calculator` class and answer the following questions
    a. Which variables are used to refer to the addition and subtraction buttons? What are their types?

    b. The layout of the components is achieved through the use of two container instances, the main `JFrame` and a `JPanel`. What kind of Layout Managers does each have? How many rows and how many columns does each have?

    c. What method was used to add an `ActionListener` to each of the buttons? What method is defined in the `ActionListener`?

2. Demonstrate your working calculator program (with the division button) to a lab instructor and have them sign this sheet. Turn it in to a lab instructor.
