1 Course Info

Lectures: Time & Venue MWF 12:30 – 1:20
Avery Hall 109

Recitations: Time & Venue Tue 5:30 – 6:20
Avery Hall 108

Prerequisites CSCE 155 and Math 106. CSCE 156 recommended but not required.

http://www.cse.unl.edu/~cse235

Textbook

Discrete Mathematics and Its Applications

Instructor

Berthe Y. Choueiry
choueiry@cse.unl.edu
360 Avery Hall
Office hours: M/W 1:30 – 2:30
Also by appointment

GTA

Robert Woodward
rwoodwar@cse.unl.edu
Office hours: Thursday 5:30–6:30 p.m. and
Friday 9:00–10:00 a.m., Student Resource Center
Also by appointment

2 Course Description

Computer Science is not programming. Rather, Computer Science is the mathematical modeling and study of what computation is—that is, what problems have a computational solution and how efficient that solution can be. Thus, a strong foundation in mathematics is essential to your success as a computer scientist. At the heart of computer science are fundamental, discrete structures which we will study in this course. Specifically, you will learn many of the mathematical definitions, techniques, and ways of thinking that will be useful in Computer Science.

3 Tentative Schedule

Below is a tentative list of topics I intend to cover along with the relevant sections of the text. This schedule may be changed and topics added/removed. Furthermore, though we will follow the book, additional material may be introduced (with sufficient resources) while the depth of each topic may vary.

<table>
<thead>
<tr>
<th>Topic</th>
<th>Sections</th>
</tr>
</thead>
<tbody>
<tr>
<td>Propositional Logic</td>
<td>1.1 - 1.2</td>
</tr>
<tr>
<td>Predicate Logic</td>
<td>1.3 - 1.4</td>
</tr>
<tr>
<td>Proofs</td>
<td>1.5 - 1.6</td>
</tr>
<tr>
<td>Sets</td>
<td>2.1 - 2.2</td>
</tr>
<tr>
<td>Functions</td>
<td>2.3</td>
</tr>
<tr>
<td>Relations</td>
<td>8.1, 8.3 - 8.6</td>
</tr>
<tr>
<td>Algorithms</td>
<td>3.1 - 3.3</td>
</tr>
<tr>
<td>Induction</td>
<td>4.1 - 4.3</td>
</tr>
<tr>
<td>Counting</td>
<td>5.1 - 5.2</td>
</tr>
<tr>
<td>Combinatorics</td>
<td>5.3 - 5.5</td>
</tr>
<tr>
<td>Recursion</td>
<td>7.1 - 7.2</td>
</tr>
<tr>
<td>PIE</td>
<td>7.5</td>
</tr>
<tr>
<td>Graphs</td>
<td>9.1 - 9.5</td>
</tr>
<tr>
<td>Trees</td>
<td>10.1 - 10.3</td>
</tr>
</tbody>
</table>
I intend to teach from a combination of slides and board work. I will make handouts of the slides available, but you are ultimately responsible for the material, thus regular attendance is strongly encouraged. Furthermore, you will be expected to read the relevant sections of the textbook before coming to class.

The instructor for the recitations is Robert Woodward, a graduate teaching assistant (GTA). Recitation meets every Tuesday from 5:30 to 6:20 in Avery 108. Recitation will primarily serve as a question/answer session and an opportunity for you to see more examples of concepts presented in lecture, therefore you should come prepared with any questions or examples that you wish to see worked out. There will be a quiz at almost every recitation.

4 Grading

Grade distribution is as follows:

- Homework 30%
- Quizzes 15%
- Pretest 3%
- Progress Assessment Test (PAT) 2%
- First midterm 15%
- Second midterm 15%
- Final 20%

- If you have questions about grading or believe that points were deducted unfairly, you must first contact the GTA (Robert) to see if the problem can be resolved.
- Such questions should be made within 5 working days after the graded assignment has been returned. No further consideration will be given to any assignment 5 working days after it has been graded and/or returned to you.
- It is important to emphasize that the goal of grading is consistency. A grade on any given assignment, even if it is low for the entire class, should not matter that much. Rather, students who do comparable work should receive comparable grades (see the subsection on the scale used for this course).

4.1 Homework

The GTA will assign about one homework per week. Homework is usually on a Friday and due the following Friday before class. Homework may consist of selected exercises from the textbook as well as original problems and programming assignments. Please carefully follow the indications below:

- You will be expected to follow all instructions specified on each homework assignment.
- Clarity and legibility are of great importance. If homework is sloppy or unclear, points will be deducted.
- You are not required to typeset your homework assignments, however, it is strongly recommended that you do so using \textsc{\LaTeX} or a similar typesetting system. Bonus points are give for typesetting homework in \textsc{\LaTeX} only, but in no other word-processing program. Resources for \textsc{\LaTeX} are available on the course web page. If you typeset your homework, you must submit the PDF file by webhandin.
- Two students can work together and submit a single homework under the condition that they must typeset their homework in \textsc{\LaTeX}. 

3
• Programming portions (when assigned) of each homework must be completed using C++ or Java, and must compile and run on cse.unl.edu. Code that does not compile or run on cse.unl.edu will be ignored and considered as incorrect.

• Source files, both \LaTeX and program code, and all relevant files must be handed in using the CSE web handin program (http://www.cse.unl.edu/handin).

4.2 Quizzes

There will be almost weekly quizzes (i.e. they may or may not be announced in advance) given at any time during the recitation on Tuesdays. In general, there will be no make-up quizzes. Exceptions may be made in certain circumstances such as health or emergency, but you must make every effort to get prior permission. The goal of the quizzes is to ensure that you are keeping up with the required readings and the class discussions, and quickly identify misunderstandings. They will generally be short and will cover recent topics. Quizzes will cover all material from:

• The required reading.
• Textbook examples.
• Class discussions.
• Slides.

4.3 Pretest

There will be a required pretest on Friday, August 27th during the lecture. The pretest will count for 3% of the final grade. In general, there will be no make-up pretest. Exceptions may be made in certain circumstances such as health or emergency, but you must make every effort to get prior permission.

4.4 Progress Assessment Test (PAT)

As part of CSE’s assessment of its academic programs, every student in this course must take a Progress Assessment Test (PAT) at the end of the semester. Some time between Wednesday of the fourteenth (14th) week of classes 12/1/2010 and Wednesday of the fifteenth (15th) week of classes 12/8/2010, you will need to go to the Arts & Sciences Testing Center in 127 Burnett Hall to take a proctored exam in Blackboard of 30-40 multiple choice questions based on content of this course. This exam will count towards 2% of your final grade.

4.5 Exams

There will be two midterm exams and one final exam given in class (see the schedule for dates). Exams are not comprehensive. These exams will be closed-book exams, but you have the option of using a single 8.5x11 sheet of hand-written notes (front and back). You will hand in your cheat sheet along with your exam. In general, there will be no make-up exams. Exceptions may be made in certain circumstances such as health or emergency, but you must make every effort to get prior permission. The projected exam dates are:

• Midterm 1: Wednesday, September 29, 2010.

Final: Tuesday, December 14, 2010, 3:30–5:30 p.m.

Exam copies are not given back to students. However, students must check and discuss their exams with GTA and/or instructor as instructed by email. This requirement is a solid one and will never be waived. Students have two weeks to visit with the GTA/instructor about their exams during office hours or by appointment. After that deadline, one (1) point will be deducted from the exam’s grade if students do not meet with GTA/instructor. Grades will be posted on Blackboard after two weeks.

4.6 Late work

Please make note of the following policies:

- All homework are due at the beginning of each class on the due date (usually, Friday) unless specified otherwise.
- You are allowed to turn in two and only two late assignments (without penalty) twenty four hour (24 hours) after the homework was due. No assignments will be accepted after this time. The web handin program that you will use enforces a strict handin time based on the CSE server’s clock.
- Programs or homework that are even a few minutes late will be marked as late so is extremely important that you handin your electronic files well within the time that they are due.
- All parts of a homework must be handed by the deadline.
- When giving your paper copy, make sure it is given by hand to the GTA or the instructor. If they are not available, you can give it the CSE Office Staff, explicitly asking that they put a time stamp when they receive it from you. Copies that are not time stamped by CSE Staff will be considered as handed in whenever the GTA or the instructor physically receives them.

4.7 Bonus points

You can collect bonus points for participating in class discussions and providing useful feedback:

- Attendance will be taken at the beginning of every lecture. A perfect attendance will be awarded by up to 3 bonus points.
- Some homework, quizzes, and exams will include bonus questions.
- An individual who typesets her/his homework in \LaTeX will receive bonus points.
- Bonus points will be awarded for finding errors in slides or in discussions.
- Filling the end of semester evaluation will be awarded a bonus point.

4.8 Scale

Letter grades will be awarded based on the following scale. This scale may be adjusted upwards if the instructor deems it necessary based on the final grades only. No scale will be made for individual assignments.
4.9 Academic integrity

All homework assignments, programs, quizzes, and exams must be your own work. No collaboration with fellow students, past or current, is allowed unless specified otherwise. The Computer Science & Engineering Department has an Academic Integrity Policy. All students enrolled in any computer science course are bound by this policy. You are expected to read, understand, and follow this policy. Violations will be dealt with on a case by case basis and may result in a failing assignment or a failing grade for the course itself. The most recent version of the Academic Integrity Policy can be found at [http://cse.unl.edu/ugrad/resources/academic_integrity.php](http://cse.unl.edu/ugrad/resources/academic_integrity.php).

5 Communication

The best way to communicate with the instructor and the GTA is through email to the address [cse235@cse.unl.edu](mailto:cse235@cse.unl.edu). Messages sent to this address will be received by both the instructor and the GTA, who will respond to the requests within regular business hours. Moreover, I may send out emails to the class using the account [cse235-ml@cse.unl.edu](mailto:cse235-ml@cse.unl.edu). However, these emails will only be sent out to your CSE email accounts. Because spam filters may reject some emails, it is very important that you use your CSE email account for all communications (they will all be white-listed).

Another valuable communication tool is the course web page. Announcements and resources will periodically be made available. Also, there is an anonymous suggestion box that you may use to voice your concerns about any problems in the course if you do not wish to be identified.

Finally, I will hold regular office hours on Monday and Wednesday from 1:30 to 2:30 p.m. in Avery Hall 360. The GTA’s office hours are Thursdays from 5:30 to 6:30 p.m. and Fridays from 9:15 to 10:15 a.m. in the Student Resource Center. We will make ourselves available by appointment; please email us to set up one. Generally speaking, you should talk to Dr. Choueiry for questions about course material and lecture. You should talk to Mr. Woodward about grading, homework, and recitation material.

6 Special Needs

Students with special needs should contact the instructor as soon as possible.
