2.1:44 (bonus)	126		3	
Typesetting (be	onus)		7	
Total			66	

**Problem A:** Use proof by contraposition to prove that if  $x + y \ge 2$  where  $x, y \in \mathbb{R}$ , then  $x \ge 1$  or  $y \ge 1$ .

**Instructions** Follow instructions *carefully*, failure to do so may result in points being deducted.

- The homework can be submitted on paper or via handin. Homework *neatly* formatted in LaTeXwill receive a 10 percent bonus. You will not receive the bonus points if you work with a partner (see below).
- Clearly label each problem and submit answers in order.
- Staple this cover page to the front of your assignment for easier grading.
- Late submissions will not be accepted
- When you are asked to prove something, you must give a formal, rigorous, and complete a proof as possible. Each step in your proof must contain explanation that would allow us to understand what theorem/logic you have applied to arrive at that step.
- You are to work individually, and all work should be your own. Check partner policy below.
- The CSE academic dishonesty policy is in effect (see http://cse.unl.edu/ugrad/resources/academic\_integrity.php).

Partner Policy You may work in pairs, but you must follow these guidelines:

- 1. You must work *all* problems *together*. You may not simply partition the work between you.
- 2. You must use LaTeXand you may divide the typing duties however you wish.
- 3. You may not discuss the problems with other groups or individuals.
- 4. Hand in only one hard copy with both author's names.
