

## CSCE 235H Introduction to Discrete Structures

### CHECKLIST FOR SUBMITTING HOMEWORK

Please conform to the guidelines below when submitting your homework. Homework that does not obey those guidelines will be *penalized*.

- Always turn in a *paper* (i.e., hardcopy) of your homework, whether printed or handwritten. This requirement applies regardless of whether you are submitting your homework on handin or not.
- Submitting with handin is optional except if you format your homework in LaTeX. If you choose to use LaTeX, you must also (i.e., in addition to the hardcopy) turn in the TEX and PDF files on webhandin.
- Staple the *cover* sheet on top of your submitted hardcopy. The cover sheet is the first page of the PDF document of the homework available from the course's website. Your grade will be recorded on it on the cover sheet.
- Write your name on the cover sheet.
- The submitted hardcopy must be single sided: Whether you print or you write, please use only one side of the page. (CSE requires us to scan your homework, and the scanner scans only single-sided pages.)

When in doubt, please send your question on Piazza.

Best wishes,  
Your committed GTA, UTAs, and instructor
