**Activity 1: Read the Generation GPS article.**

\* "Radomata" - tracks distance traveled, speed (useful for swimming) can also compute calories burned

\* "When will it?" - after the user specifies the time frame, Yoopt will trace the user's path during that time period. (Useful for finding lost items)

\* "Hide Me" - hides the user from other people → user can specify who to hide from

Activity 2: Come up with two new features that you would add to the Loopt system.

Team Name: \_\_\_\_\_

Activity 3: Describe a general GUI design for each of the two features.

\* "Where was I?"

Drop down menu - choose the date  
Spin button - choose the time period

Button -

... creates a list of places the user was during that time period

+ user can double click on a place list item to open a map of that area & his/her path on that map.

\* "Pedometer"

utilizes Buttons

↳ look up certain dates data

↳ total data for today

↳ Starts collecting data now

until user clicks

stop - given

the option to store this data - archived. IN PAST

takes user to menu

shows data  
• distance  
• calories  
• speed  
• etc...
