Matt Murrer

Kate Weandere

Activity 1: Read the Generation GPS article.

Activity 2: Come up with two new features that you would add to the Loopt system.

Team Name: The Glitchniktors

1) User Status

- Ex sleeping, eating, school, work

- A different icon or additional symbol could be used to specify each status.

- This would also be helpful in determining

- if your friend is available to talk or hangout. ^{s+a+us}
- You can set certain locations to automatically change your

2) Turn-by-Turn directions to a selected user

- If you select a friend's image, Loopt will provide GPS based directions from your location to your friends' location

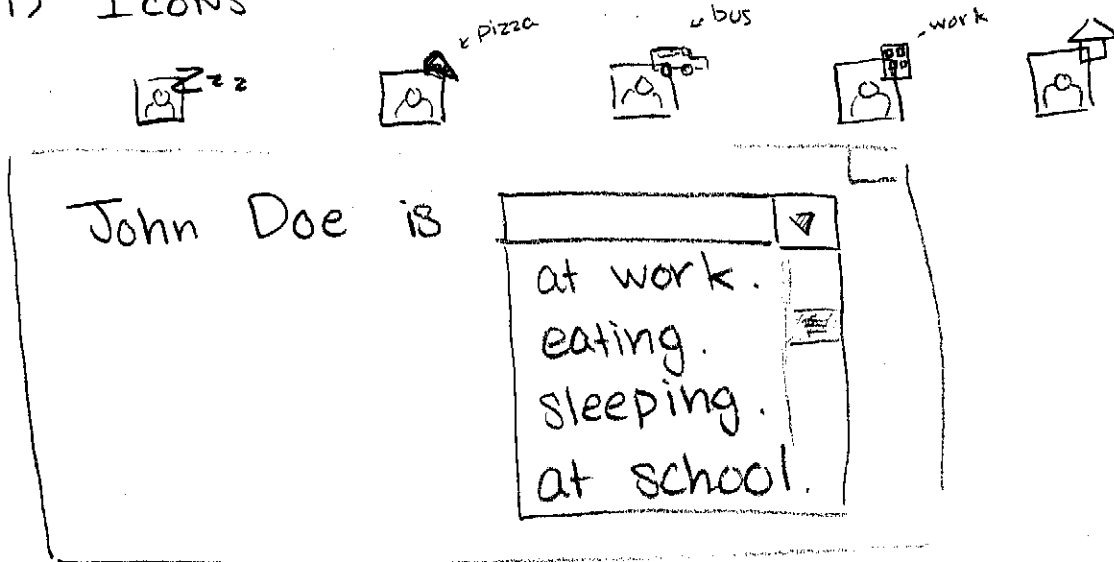

- Voice activation - response

- Mode of transport

- Distance to friend.

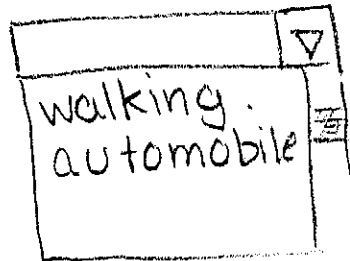

Activity 3: Describe a general GUI design for each of the two features.

1) ICONS

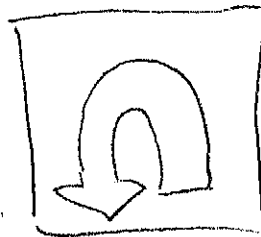

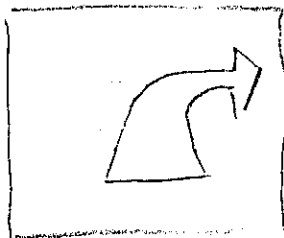

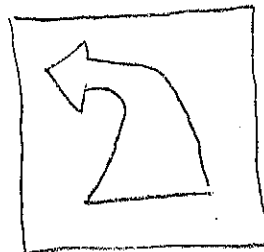

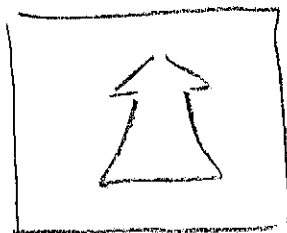

2) Select Friends' icon.

Mode of transport

walkways vs. Streets

On Screen:

Additional Features

- Voice directions
- Text representation of directions
- Updating distance to friend.
