

Take advantage of this opportunity from:

Intermediate Teachers of Mathematics

ITEAM

2018-19 ESU 3/OPS Cohort - UNL

We are pleased to begin accepting applications from ESU 3 and Omaha Public Schools teachers who teach math in grades 4-6 for ITEAM, the Intermediate TEACHERS of Mathematics program. ITEAM is an 18-hour, 13-month graduate program through the University of Nebraska-Lincoln.

- Ideal for teachers who enjoy teaching mathematics and seek to develop special strengths in mathematical and pedagogical knowledge, which transfers into enhanced learning in their classrooms.
- Participants will take two math classes and earn 6 graduate credits in Summer 2016. Classes will meet Monday-Friday, June 11-15 and June 18-22. Classes will meet from 7:30 a.m. to 4 p.m., at ESU 3 in La Vista.
- The first two courses will be Math 800T: Mathematics as a Second Language (the first course in the Math in the Middle program) and Math 804P: Problem Solving and Critical Thinking in the Elementary Classroom, a course designed by a fifth-grade teacher especially for elementary teachers.
- Remaining four courses are in Fall 2018-Summer 2019. Teachers will take TEAC 808A and TEAC 808J during the academic year. These two education courses will be taken in conjunction with those teachers participating in the Primarily Math program.

Apply now! We are currently accepting applications for the ITEAM program, which will begin coursework on June 11.

**Application deadline:
March 15, 2018**

Teachers should contact administrators about potential tuition support available through their district.

Textbooks and course materials will be provided on loan by the Center for Science, Mathematics & Computer Education. Email Lindsay Augustyn at laugustyn2@unl.edu with any questions.
