

## Scalable Visualization for Information Discovery

Hongfeng Yu

Associate Professor

Computer Science & Engineering, University of Nebraska-Lincoln

UNL CSCE 100

Dec 6, 2020

1

### What is Visualization?

- **Communication** of **information** using **graphical** representations
- Everyday and everywhere
  - Bar chart in a newspaper
  - Subway map
  - Weather chart
  - Stock market analysis
  - ....

2

## Why Visualization?

- Pictures have been used for communication since before the formalization of written language
- Our brain is well built for processing pictures
  - **Speed**
    - Image interpretation is performed in parallel
    - Text analysis is limited by sequential process of reading
    - One biological study estimates the transmission speed of the optic nerve at around 9Mb/sec
  - **Pattern matching**
    - Our visual system can quickly identify important patterns from massive data
      - E.g. face recognition from a large number of people

## Why Visualization?

65% of people are visual learners, infographics make it easy to learn and remember.

The use of visualized information has increased 9900% on the internet (since 2007).

## A Classic Example

- Four data sets
  - Each containing a set of data points in  $(x, y)$

Property	Value
Mean of $x$ in each case	9 (exact)
Variance of $x$ in each case	11 (exact)
Mean of $y$ in each case	7.50 (to 2 decimal places)
Variance of $y$ in each case	4.122 or 4.127 (to 3 decimal places)
Correlation between $x$ and $y$ in each case	0.816 (to 3 decimal places)
Linear regression line in each case	$y = 3.00 + 0.500x$ (to 2 and 3 decimal places, respectively)

## Magic!

## Why is Visualization Challenging?

## Early Visualization

- Perhaps the first technique for **graphically** recording and presenting **information**

Cave paintings by early man approximately **30,000** years ago

## Early Visualization

- Early graphical writing

Tartaria Tablets, 5500 BC

Kish Tablet, 3500 BC

## Early Visualization

- Some necessary need for survival

Peutinger map: the road network in the Roman Empire.  
Created in 15<sup>th</sup> century based on a 4<sup>th</sup>-century map

## Early Visualization

*The Lord of the Rings, 20<sup>th</sup> century*

12

## Early Visualization

## Vis + Data Mining

A section of John Snow's map of the deaths from cholera in London in 1663.

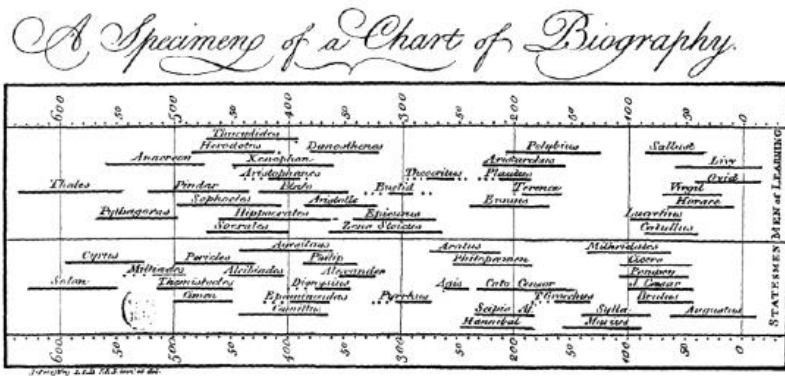

**Each bar within the houses represents one deceased individual.**

13

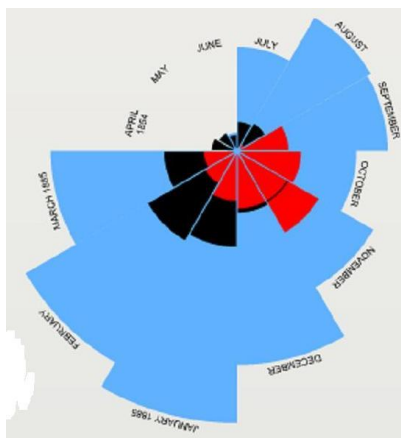

## Early Visualization

Joseph Priestley's display of the longevity of famous people (1765).

## Early Visualization

Florence Nightingale's coxcomb chart showing monthly deaths from battle and other causes (1858).

Blue represents the deaths from disease, red represents deaths from wounds, and black represents all other deaths.

## Early Visualization

Leonardo Da Vinci's study of the motion of the human arm (1510).

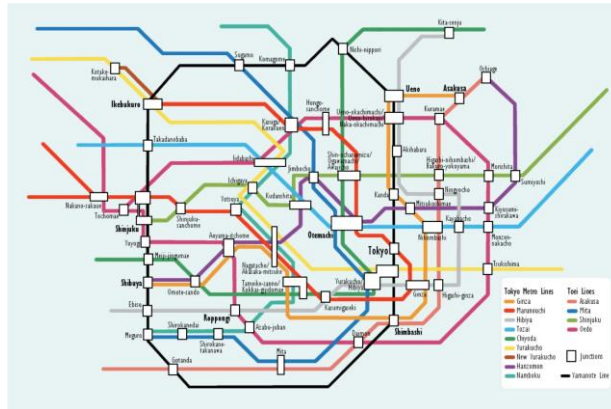

## Early Visualization

Leonardo Da Vinci's picture of water flow

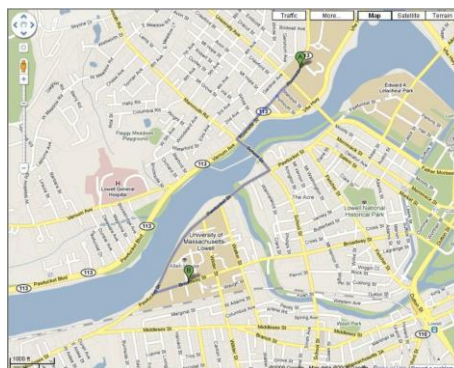

## Visualization Today

The Tokyo Underground map. A logical representation of the metro highlighting **qualitative** relationships between the stops.

20

## Visualization Today

The google.com map directions from 198 Riverside St., Lowell, MA (UMass Lowell, North Campus) to 883 Broadway St., Lowell, MA (UMass Lowell, South Campus). Google.com maps provide graphical cues drawn on top of road maps to indicate driving directions from point A to point B.

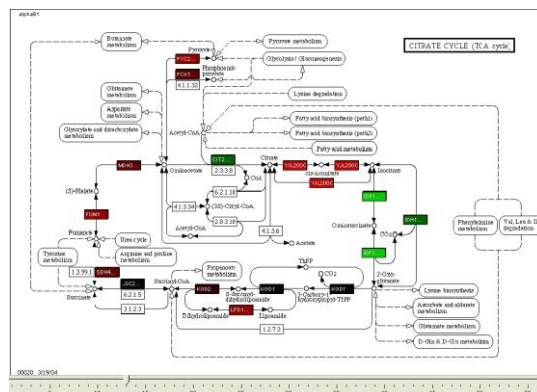

21

## Visualization Today

23

## Visualization Today

A pathway represented by a network with nodes representing genes and color the level of expression.

24

## Why is visualization a necessity?

- Galileo's Analysis of Projectile Motion

Parabola

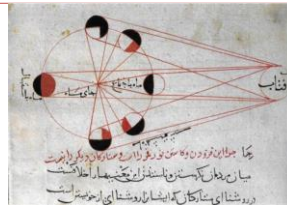

$$y = ax^2 + bx + c$$

<http://www.mcm.edu/academic/galileo/ars/arshtml/mathofmotion2.html>

25

## Why is visualization a necessity?

- Many many examples
  - Kepler's laws
  - Newton's laws
  - DNA structure
  - ... ..
  - Numerous scientific publications

Produced by Biruni circa 1030. Shows the phases of the moon in orbit.

Planetary motion.

The x-ray diffraction image

26

### Why is visualization a necessity?

- Human's Knowledge Discovery Pipeline

- Visualization
  - Can be used at every step of the KD pipeline
  - Often a part of this larger process
  - Tightly coupled with analysis

### Visualization vs. Computer Graphics

- Computer Graphics
  - Graphical objects and organization of graphic primitives
- Visualization
  - More than computer graphics
  - Based on the underlying data (spatial positions, populations, or physical measures)
  - Include aspects from numerous other disciplines
    - Human-computer interaction
    - Psychology for human perception
    - Databases
    - Statistics
    - Data mining
    - ...

## Visualization vs. Computer Graphics

- Computer Graphics
  - Creation of images and animations for **visual realism**
  - Video games, cartoons, advertisements, and movie special effects
- Visualization
  - Not emphasize visual realism, but **effective communication of information**
  - Many applications do not deal with physical objects

## Visualization vs. Computer Graphics

- Computer Graphics provides tools for visualization
  - Graphics-programming language
    - OpenGL, DirectX, Processing, Java3D
  - Underlying graphics Hardware
    - Intel, Nvidia or AMD graphics cards
  - Rendering process
    - Different shading
  - Output format
    - JPEG, TIFF, AVI, MPEG

## Visualization vs. Computer Graphics

- Paper keywords from Computer Graphics Forum

This image itself is a visualization. →

## Why is Visualization Challenging in Big Data Era?

- Big Data – **Dilemma**

Example: Landslide lake detection

**Coarser resolution:**  
missing details

**Finer resolution:**  
Finding the needle in a haystack

## Why is Visualization Challenging in Big Data Era?

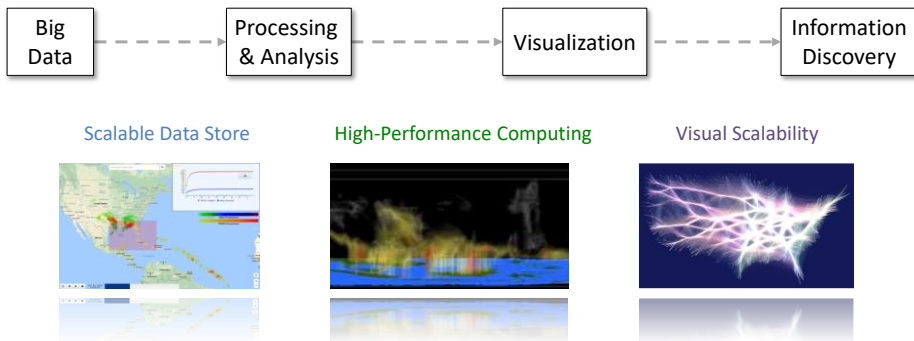

## Our Research Theme

## Our Research Theme

Holistically address every stage  
of a visualization pipeline

## Our Research Theme

Holistically address every stage  
of a visualization pipeline

## Visual Scalability

Massive Data vs. Limited Screen

Example: Traditional node-link diagram for network data

38

## Visual Scalability

Massive Data vs. Limited Screen

Example: Traditional node-link diagram for network data

39

## Visual Scalability

Massive Data vs. Limited Screen

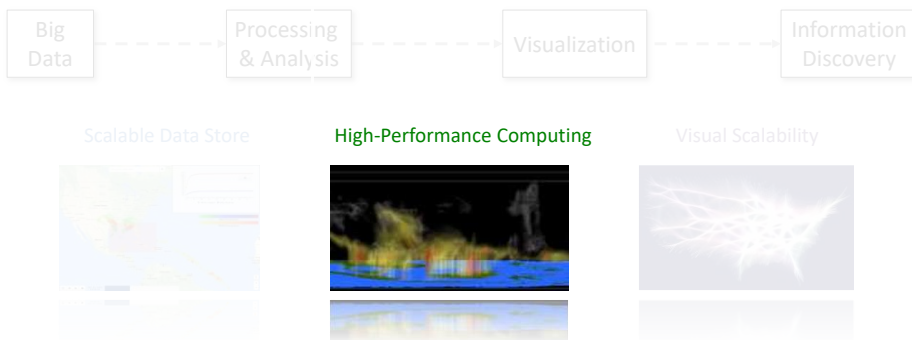

Our research: Edge bundling for network data

[Yves 2019]

## Our Research Theme

Holistically address every stage  
of a visualization pipeline

## High-Performance Computing

Our research: Exploit high-performance compute technology

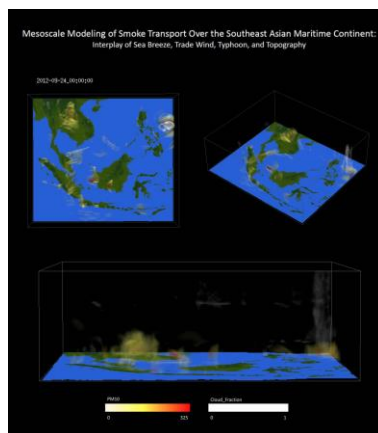

- Accelerate data processing
- Ensure **interactivity**

## High-Performance Computing

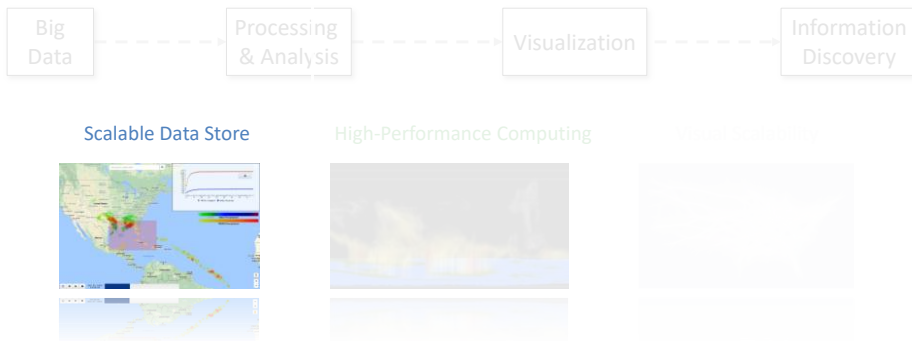

Our research: Exploit high-performance compute technology

- Accelerate data processing
- Ensure **interactivity**

## Our Research Theme

Holistically address every stage  
of a visualization pipeline

## Scalable Data Store

Our research: Design new distributed data indexing and placement solutions

- **Petabytes and beyond**
- **Diverse data types and structures**  
(vector, raster, relation, binary, and text)
- **Complex data presentations**  
(shapefiles, images, tables and point clouds)

## Scalable Data Store

Our example work: SpatioTemporal Adaptive-Resolution Encoding (STARE)

## Our Research Theme

Lead to new scientific  
applications and discoveries

Scalable Data Store

High-Performance Computing

Visual Scalability

## Tweether: A Visualization Tool Displaying Correlation of Weather to Tweets

## Plant Phenotyping

Our research: Develop new imaging and 3D reconstruction systems to capture high-resolution dynamics of plant growth.

Multi-view images

3D reconstruction

Panicle segment

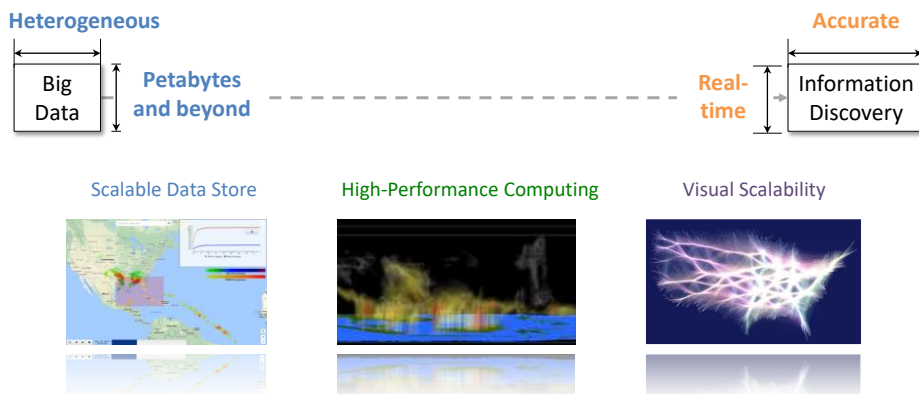

Trait extraction

## Plant Phenotyping

Our research: Develop new imaging and 3D reconstruction systems to capture high-resolution dynamics of plant growth.

## Our Research Theme

Thank You!
