[1] What are 1 or 2 specific things that helped you learn in this class?

- -Having excellent group members helped a lot
- I really liked the fact that Dr. Scott was very often available to meet with the teams and very prompt in responding to student emails. He was also very understanding when the projects were not proceeding at the pace that was desired.
- Professor Scott does an excellent job of getting students interested and motivated in this course.
- The internet and library helped me learn the materials.
- actually doing everything with research to design

[2] What are 1 or 2 specific things that caused a problem with your learning in this class?

- -None
- Much of our development time was taken because

we did not choose a project until the first week of the semester. Because of this, we had to go through the finding and ordering of parts, something that took a lot of time and could have been avoided by finalizing the project decision in CSCE 488.

- The classroom environment in the cse489 lab is absolutely terrible. It's always extremely hot in the room and not all of the computers work. Atleast 1 oscilliscope doesn't work.
- The fact that we had to learn the material for our project entirely on our own. Of course the professor did what he could to help, but nobody could have been preparred for what we were trying to accomplish.

[3] Please provide 1 or 2 practical suggestions on ways to help improve student learning in this course.

- Control the temperature. Fix the oscilliscope
- I think the course would have gone much better if we had chosen the project during the second half of CSCE 488. This would give us time to research our project and possibly make orders for parts. Doing this gives the teams most of CSCE 489 to work on the technical parts of the project rather than trying to do initial research and searching of parts during times when they should be developing.
- Overhaul the course. Use CSCE488 as a better stepping stone to prepare students for the rigors of doing a project all semester. Cover topics and subjects in 488 relevant to the project that students will be doing in 489.

[4] How did you like this online course evaluation system?

- Fine.
- Good.
- I like it. It provides a way to make sure everyone does the evals and also eliminates the annoyance of having to find someone to take the evals to the office
