[1] What are 1 or 2 specific things that helped you learn in this class?

- I loved having TS instead of exams or quizzes.

I thought the project was a good idea, that way we can see how this stuff is being used in the industry.

- the book?

[2] What are 1 or 2 specific things that caused a problem with your learning in this class?

- Statistics

and

$0 * \log 0$ is not 0!!!

- andy. haha, just kidding.

[3] Please provide 1 or 2 practical suggestions on ways to

help improve student learning in this course.

- the "dumb question asker" forced participation for the people that wouldn't otherwise participate, but only for one day, It seemed like other than the dumb question asker, only 2 or 3 people talked much. Though I'm not sure how to force them to speak up more.

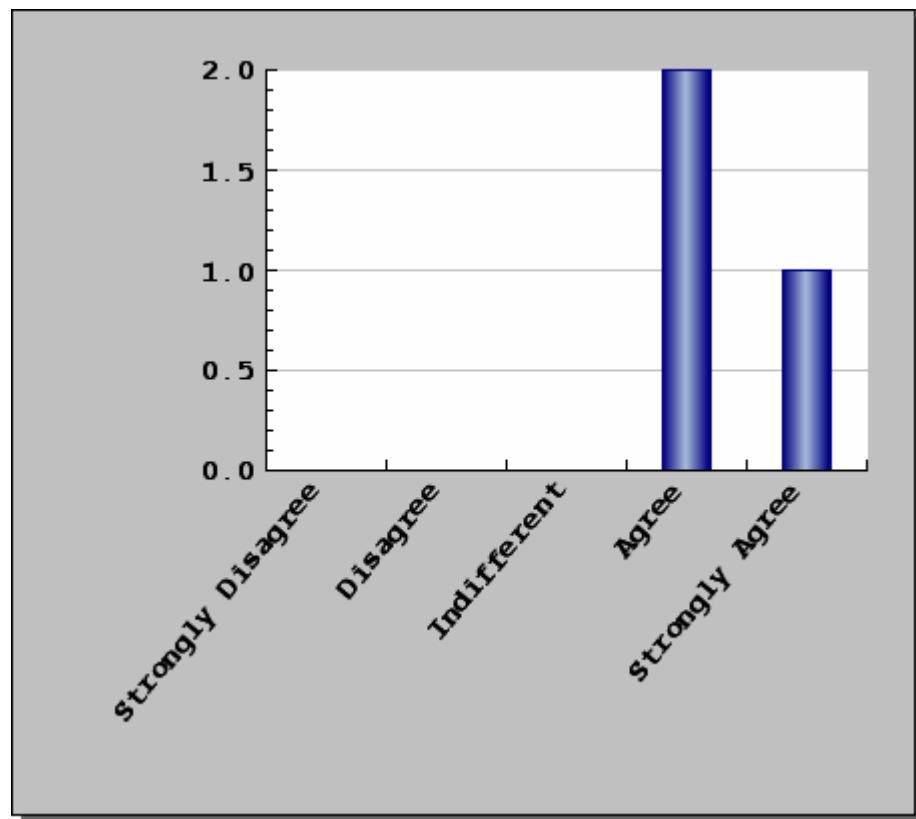

[4] How did you like this online course evaluation system?

- I liked this better, except I worry about people spying on me and trying to figure out how I rated classes.
- i dont like evaluating courses before I've completed them.

[5] Other comments that you would like to make:

- wuzzle.

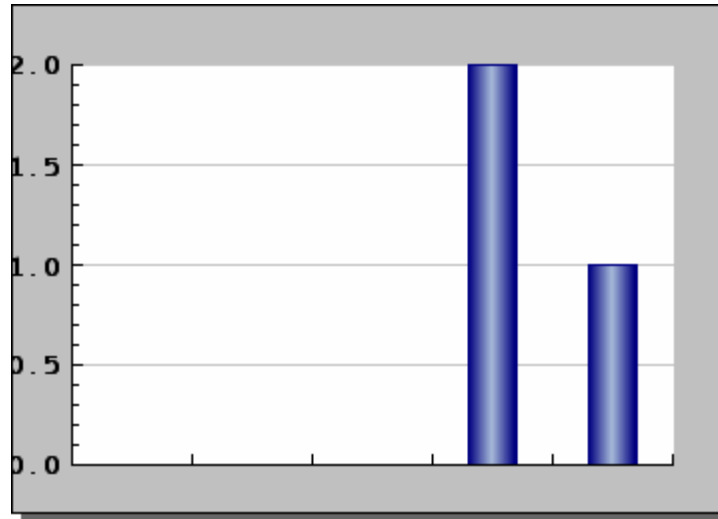

1. I learned more from doing the topic summaries and the course project than I would have learned from taking exams.

7. Using LASSO in the homeworks taught me how to write modular code and conform to an API.

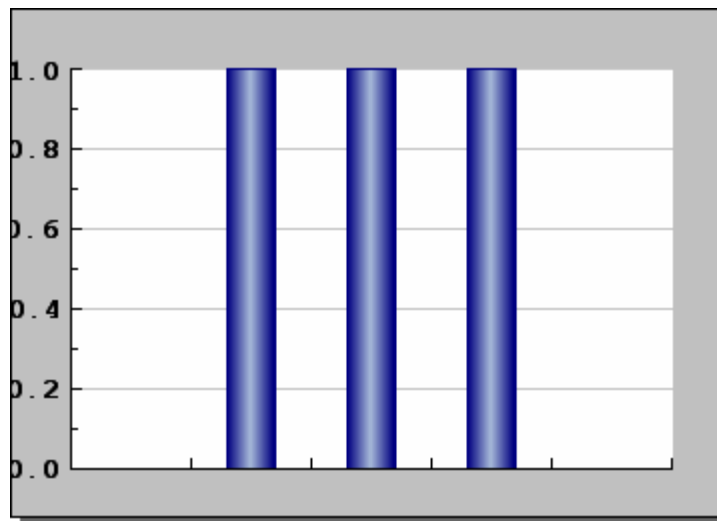

Strongly Disagree : 0
Disagree : 1
Indifferent : 2

8. Using LASSO made the homeworks more interesting since I got to train my learning algorithms on real web data.

Strongly Disagree : 0

9. Requiring LASSO on the homeworks did not significantly interfere with my ability to complete the assignments.

10. Give your opinion on how well the topics covered in class matched your expectations and how much they interested you.

- I didn't really have any expectations, I didn't know a lot about AI coming in, but they interested me enough.
- they were well covered. however, sometimes the new material is difficult to grasp at first and creates confusion.

11. Offer your opinion on the amount of work required for this course, especially on the homework. Overall, would the workload have been significantly more manageable if LASSO were not required on the homework? When answering, consider the benefits of using LASSO, e.g. when implementing boosting.

- Using lasso would have been better if it would have been better explained _what_ the actual API was, and what functions we had to implement, and which we shouldn't touch. Perhaps for the first homework, the command line parsing should have been done for us, because It seemed to me that that file was part of what I was supposed to modify, which it wasn't, beyond the text parsing.

Its hard to say if using LASSO took more time then it would have taken without using it, as I dont konw how much time I would have ended up spending if I had to do it on my own.

- without lasso we would have had greater flexibility on writing the code.

12. What is your opinion of the TA?

- He seemed to respond to my questions via email promptly enough, and was helpful when he did.
- chris is a great guy! he's always been very helpful and nice. A+ to this exemplary TA!
